Activity 1: Phonology as pattern recognition

1. Some simple patterns: what comes next?

2. Using numbers. What comes next?

1	3	5	7	9	_____	_____
4	5	7	10	14	_____	_____
64	32	16	8	4	_____	_____

3. Somewhat more complicated: non-repeating patterns. What patterns can you identify across the whole set of data (i.e., not just looking at one row)?

43210
43202
43217
43265
43279

4. Using random symbols. What patterns can you identify?

&@!%()
\$*?&&#(^
)^%?!@(@
!%*?@)%
#^?&&\$(#
@^%^(^
%(@
*?#?\$(
(\$!*??
